PROFESSIONAL SUMMARY

Results-driven B.Tech Information Technology student (May 2026) with expertise in business analysis, requirements gathering, stakeholder management, and IT consulting. Delivered two end-to-end software projects using SQL, process mapping, and cross-functional team coordination. IBM-certified in Cloud Essentials, Big Data Foundations, and Python Programming. Seeking a Business Analyst or IT Consultant role to bridge business and technology for measurable organizational impact.

EDUCATION

Bachelor of Technology — Information Technology

Shri Ramswaroop Memorial College of Engineering & Management, Lucknow, India | Aug 2022 - May 2026

Class XII — Central Board of Secondary Education (CBSE)

Surya Public School, Uttar Pradesh, India | Year of Passing: 2022

Class X — Central Board of Secondary Education (CBSE)

Rameshwaram International Academy, Uttar Pradesh, India | Year of Passing: 2020

EXPERIENCE

IT Development Intern — IBM Developer Skills Network (Remote) | Sep 2023 - Oct 2023

- Analysed and documented data workflows using SQL on IBM SkillsBuild; identified process gaps and proposed structured improvements to reporting pipelines, reducing manual query effort.
- Translated business data requirements into optimised SQL queries and stakeholder-ready reports, delivering end-to-end business analyst outputs within a live enterprise platform environment.
- Produced requirement documentation, process summaries, and stakeholder presentations ensuring all deliverables aligned with defined business objectives and project timelines.

KEY PROJECTS

Catering Service Marketplace — Business Analyst and Team Lead | Jan 2024 - Apr 2024

- Conducted requirements gathering from multiple stakeholder groups; defined user stories, acceptance criteria, and functional specifications ensuring full alignment from business need to solution delivery.
- Mapped current and future-state workflows; designed access control model meeting compliance requirements and coordinated cross-functional team across design, development, and testing phases — delivered on time.

Medicine Search and Pharmacy Locator — IT Consulting Project | Dec 2025 - Present

- Identified healthcare access gap through user research; defined business requirements, data flow diagrams, and use cases — coordinating with developers to ensure solution meets business objectives.
